(54) Title: MULTIPOLAR CABLE FOR TRANSMITTING ENERGY AND/OR SIGNALS, METHOD AND APPARATUS FOR THE PRODUCTION THEREOF

(57) Abstract: A multipolar cable (14) for transmitting energy and/or signals, as well as an extrusion method and apparatus for the production thereof, is described. The multipolar cable (14) according to the invention comprises: at least three transmissive elements (15), and a sheath (16) in which at least three longitudinal housings (17) are defined, the longitudinal housings (17) being intended to house respectively the at least three transmissive elements (15) according to a predetermined configuration and being formed within respective substantially lobe-shaped longitudinal portions (18) of the sheath (16). 10 The multipolar cable (14) of the invention allows to connect the transmissive elements (15) to one or more consumption points by means of at least one connector (20) provided with at least three perforating elements (21).
